

City of Chandler		
Feedback on the alternative methods proposed at Stakeholder Meeting	New alternative you would like to be considered by AWBA staff	Other comments or feedback
<p>Chandler would like to see credit distribution extended to a timeframe which matches the timeframe require to use direct recovery infrastructure at TDRP. I expect that timeframe is likely in the range of 25-30 years. In order to ensure the credit distribution is extended out to last for 25-30 years, the policy should match the historical planning assumption of firming up to 20%. Chandler is supportive of deviating from the DCP policy to firm 100% of M&I cuts through 2026. However, we feel it is important to firm 20% because that is what M&I subcontractors have planned for.</p>	<p>Chandler would like to see credit distribution extended to a timeframe which matches the timeframe require to use direct recovery infrastructure at TDRP.
